# THE DEPARTMENTS

The present form of the crest is the result of much labor and a long drown out correspondence. The shield which serves as the background is one of the oldest and simplest in heraldry. The crest is done in prominent colors, red and gold which are the proper college colors. Crown in the gold chief at the top of the shield indicates that the college is a Government institution. The crown symbolizing colonial rule was replaced post- independence, by a lighted lamp that signifies knowledge. The chevron in the gold is an ancient heraldic decoration and stands here for the imposing front of the main college building with its gabled roof.

Subject of Mathematics is taught at the Gujarat College right from its autonomous start up in 1868. A high profile Mathematician like Prof. P. C. Vaidya (former Vicechancellor of Gujarat University), known for his mathematical genious and approach to the theory of relativity especially for the radiating star, has rendered his valuable services as a faculty in the past. Department has a rich collection of the oldest to the most modern books and periodicals on Mathematics.

Statistics Dept is one of the oldest departments in the college established in 1965. The department teaches the subject at under-graduate level in Arts and Science faculties. Subject area covered at the Department include Demography, R. C., Sampling Techniques, Operational Research, Computer Programming in C language etc. Former head of this department Shri N. R. Patel and Shri K. V. Panchal also served and retired as Principal with the government cadre. Several alumni from this department have won gold medals, and many are presently serving in India and abroad with diverse types of institutes viz. banks, hospitals and government establishments as statistical officer or with quality control in managerial positions.

To dispel some misconceptions about hypnotherapy as well as to explain what output will be achieved during this workshop, Dr. P.M. Choudhary gave briefing on how the science behind hypnotherapy works, how to identify and overcome the limiting beliefs, techniques for relaxation and self-hypnosis.

Dr. Jayendra Barad, the chief speaker of the workshop, while giving information in his interactive and practical session, said that hypnotherapy is a psychological treatment in which hypnosis is used. In this method, the therapist tries to bring the patient to a peaceful and balanced state, so that he can work on the unconscious mind of the person.

#### History of hypnotherapy:

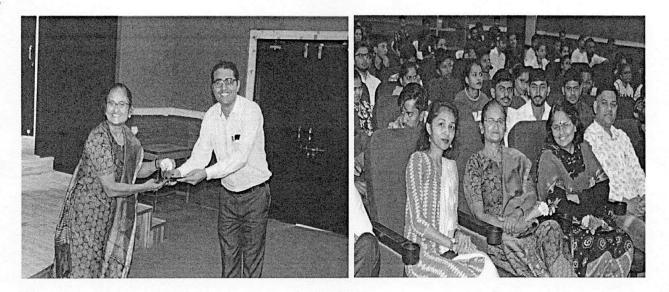

The history of hypnotherapy is thousands of years old. This method was also used in ancient Egypt and Greece. In the modern era, many researches on hypnosis were carried out by The Mesmer of France and then by German scientists. How does hypnotherapy work? During hypnotherapy, the therapist helps the patient to breathe, calm down and to remain alert. In this process, the patient's conscious mind becomes calmed and the unconscious mind is opened.

#### **Benefits of Hypnotherapy:**

- 1. Mental stress and anxiety: Hypnotherapy helps in reducing stress and anxiety.
- 2. Pain control: Helps in controlling pain in different parts of the body.
- 3. Giving up obesity and smoking: Helps to give up cravings.
- 4. Spermatorrhoea and Sleep problems: It is helpful for better sleep.

By giving in-depth information on the prerequisites for hypnotherapy, he had a very detailed discussion with all the participants present at the workshop. He presented his thoughts on some psychological causes behind physical diseases, such as the psychosomatic disorders.
